For latest System requirements & Supported Platforms, please click the link above, and visit the [product list page](#) on the Plugin Alliance website to see particular details for your product.

BRAINWORX - bx_distorange

Distortion Stomp Box

Classic Guitar Tones for Your Rig

Thank you for using the BRAINWORX bx_distorange plugin.

The bx_distorange was developed to be used in combination with virtual amplifier simulations in your DAW. Insert it before (or even after) any amplifier plugin or other effects in your chain to achieve awesome distortion on any signal. Get creative!

Based on the famous Boss DS-1 Distortion®, the developers at Brainworx have undergone

intense listening tests and faithfully modeled this plugin stomp pedal to sound astoundingly similar to the real hardware.

Legal Disclaimer: Boss™ and DS-1 are registered trademarks of Roland, Inc. bx_distorange was developed by Brainworx Music and Media GmbH based on its own modeling techniques. Roland has not endorsed nor sponsored the bx_distorange in any manner, nor licensed any intellectual property for use in this product.

Developed under license by Brainworx GmbH Germany for Plugin Alliance LLC USA.

BRAINWORX - bx_distorange

Distortion Stomp Box

Classic Guitar Tones for Your Rig

(1) TONE

Adjusts the tone of the processed signal. Settings on the left cut high frequencies, softening the sound and warming the low-end; settings on the right cut low frequencies, increasing presence and overall edge.

(2) DISTORTION

Adds distortion and results in longer sustain to the signal. Clockwise motion will produce more dramatic distortion and an increased sustain.

(3) LEVEL

Adjusts the post-processing level of output from the bx_distorange. Use it to match between Dry and Wet signals.

(4) Stomp Switch

Pedal-style on/off button, for that guitar rig feel.

BRAINWORX - bx_distorange

Chorus Ensemble Effect Stomp Box

Throaty Modulation for Your Rig

Plugin Settings Toolbar

BYPASS

Bypasses processing done by the bx_distorange
